RECAP

A close-up photograph of a weathered wooden surface. The wood grain is predominantly vertical, with a mix of dark brown and lighter, greyish-brown tones. A prominent feature is a large, curved, concentric growth ring pattern, possibly a knot or a large scar, which curves upwards from the bottom center. The surface is textured with numerous fine cracks and larger, irregular fissures, suggesting significant age and exposure to the elements. The lighting is somewhat uneven, highlighting the rough texture of the wood.
